To whom it may concern,

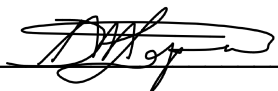

This is to certify that each product in the Canna Growth Sciences product line is exempt from registration under either the New or Old Fertilizer Act of Canada in place until October, 2023. These product do not contain any growth regulators or pesticides.

Effective October 26, 2020, the amended Fertilizers Regulations are in force. Regulated parties can comply with either the "new" regulations or the "old" regulations for a period of 3 years. This applies to the manufacture, sale, import or export of fertilizers and supplements regulated under the Fertilizers Act. Some fertilizers and most supplements require registration and pre-market assessment by the CFIA before being imported and sold in Canada. Section 3.1 of the Fertilizers Regulations specifically **exempts certain products from registration**. These exemptions are based on the risk profile of the product in question irrespective of its end-use pattern or target crop.

All products that are registered under the Fertilizers Act appear on a list of registered products on the CFIA's website. The labels of registered products bear a Fertilizers Act registration number. Unlike the PMRA, the **CFIA does not maintain a specific list of products approved for use in cannabis cultivation**. Fertilizer and supplement registrants are not obligated to identify the target crop on the label to a genus or species level and crop groupings are acceptable; as such the CFIA does not track which fertilizers or supplements are registered for a specific target crop.

If you have any further questions or concerns, please don't hesitate to reach out to us.
